COMPANY PROFILES

Max Game Manufacturer Co., Ltd operates with an 'international outlook and multi-polar coordination' strategy: its Hong Kong headquarters connects global resources, while its Guangzhou sales centre addresses domestic demand. Its Panyu R&D base has secured over 13 patents in the past three years, driving innovation.

Established in 2010, the Max Games Brand specialises in domestic and international sales and import-export operations. It ranks among Asia's premier brands in the self-service equipment niche market, with products exported to 94 countries and serving over 10,000 clients (including more than 13 leading European and American enterprises).

The enterprise builds its foundation on 'robust production capacity and exceptional quality': with Zhuocheng Products, Jichuang Hardware, and the upgraded Guangzhou Production Centre, the three bases span over 10,800 square metres. Introducing laser equipment, CNC punching machines, and other advanced tools, production capacity has increased by an average of 35% annually over the past three years.

Leveraging a team characterised by 'efficient collaboration and full-chain service', the entire chain—from R&D and production (93 professionals) to sales—operates in seamless coordination, maintaining high customer satisfaction.
